

# HiSoft cures a crippling condition.

There is a condition afflicting tens of thousands of Australians. Most of them are professionals, and many of them are doctors.

**The condition? Confusion.  
The aetiology? Computers.  
The cure? HiMed.**

HiMed is Australia's leading computer programme for the medical profession. Each HiMed software programme is specifically tailored to your individual practice, whether you be a specialist or G.P., whether there's one doctor or a whole clinic.

It can produce accounts, calculate fees, keep records, issue appointment reminders, print Medicare forms, generate statistics on individual doctor workloads and even print up the deposit slip for your banking at the end of the day...whatever your practice requires.

Combine this with HiSoft's outstanding prices for computer hardware, and you've got the total cure in one.

It's an easy to swallow package. Call them now.
