

HiFinance 3 doesn't just come with a manual. It comes with a man.

The HiFinance 3 manual is remarkably easy to read.

That's probably due more to HiFinance 3 being the easiest business accounting system to use rather than to

any great literary skill of ours.

But there's nothing like having someone around to explain it in person.

So we offer you free installation, tailoring to your business, and training of your staff by qualified accountants from Australia's major accounting firms.

Why don't we do it ourselves?

As designers of

HiFinance 3, we could explain how it's based on a series of software modules linked to a leading personal computer.

And how it's an entry level system. And how it is the most flexible and advanced system in Australia.

But none of that is as important to you as knowing what it can actually do.

It's an accounting system so who better to do the explaining and training than a qualified accountant?

Call into any HiSoft branch or dealer and ask about HiFinance 3.

One of the reasons we call it the complete business accounting system is because it comes complete with an accountant.

HiSoft Australia Pty. Ltd.
