

Would Australia's biggest PC Dealer charge like a wounded bull?

Is it possible that the biggest Personal Computer Dealer in the land would come within a bull's roar of Number One by being too expensive?

No Way!

You just don't become Number One without an absolute commitment to each and every customer. And that includes guaranteeing the right sale price.

HiSoft Computers is a corporation with annual sales which include Australia's biggest slice of the PC action. Plus rapidly expanding special task software and broad involvement in networking and the

revolutionary HiCare Service program.

To stay Number One, naturally our prices have to be sharp. For example, our IBM deals. They're unbeatable! On Model 60 and Model 80 we're offering a FREE IBM Displaywrite 4/2 or Storyboard Plus with each purchase of the IBM Operating System 2. Just what you'd expect from Australia's biggest PC dealer. HiSoft. (We were, after all, awarded Inaugural IBM Dealer of the Year!)

When you decide to check out a new PC, get the full facts.

We can guarantee you'll be able to forget the bull!
